ABSTRACT

[0025] Software developers working on multi-language systems can utilize a multi-language debugging environment. The debugging environment can be uniform across languages, and can seamlessly perform debugging between one or more languages in a multi-language environment. Such a system can have a number of attributes intended to help developers facing debugging problems in multi-language environments.

[0026] This description is not intended to be a complete description of, or limit the scope of, the invention. Other features, aspects, and objects of the invention can be obtained from a review of the specification, the figures, and the claims.
